

Central Pennsylvania Chapter Independent Electrical Contractors

Benefits of Associate Membership

Membership meetings & social events

These are the best opportunities to network and build relationships with clients and potential clients when they have more time to talk. Plan to attend, and maximize your membership!

Chapter Newsletter

Highlights Chapter activities and important events for contractor and associate members. We also recently developed a new associate members only newsletter to better highlight your upcoming opportunities.

Educational events

The Chapter sponsors various educational sessions throughout the year for both apprentices and experienced electricians. There are opportunities to develop programs around specific manufacturer items or resources that various companies offer to the benefit of all members. Some sessions also allow employees of Associate Members to participate.

Apprenticeship Program

Our registered 4 year apprenticeship program is our largest program. Training is offered at our new training facility (8 Long Lane, 17050) and there are opportunities for guest speakers to showcase tools, techniques, and other relevant topics. Associate member participation (equipment, training, and education) is a CRITICAL factor in the success of our program!

Annual Associate Member Showcase & Holiday Mixer

This is held in early December each year. It provides an opportunity for Associate Members to share company information through displays, and presentations to the whole group. The Showcase has a holiday theme with food and door prizes, and allows the opportunity to network and develop stronger relationships with contractors.

Chapter Directory

You will receive an updated Chapter directory of Contractor and Associate Members.

Additionally, you will receive numerous National benefits including the IEC Insights Magazine and newsletters, and opportunities to participate in national events and programs, and discounts.
