October 19, 2017 8-9am

IEC Training Center

This educational presentation will cover three objectives: (1) Statistics related to drug use in the workplace, medical marijuana and legal marijuana. (2) The different types of drug testing PROGRAMS--pre-employment, random, reasonable suspicion, post-accident & return to work, and (3) The different types of drug testing PRODUCTS--urine, hair, and saliva. There are many myths and rumors about lab-based saliva drug testing and urine drug testing that need to be confronted. Lastly, we'll touch on convenient, high quality alcohol testing products.

Knowing your options will allow you to implement the best substance abuse program.

Cost: Free to Central PA IEC Members
