

Central PA IEC and 

Want You to....

Fall in Love with VFD Systems

- Understand principles of operation
- Safely Maintain and Troubleshoot Motor/Motor Controls
- Recognize common causes of VFD/Motor Failure
- Formulate appropriate troubleshooting task sequences
- Identify practices to reduce downtime of Motors/VFD's

This course will be taught by Larry Roby, senior electrical engineer with Graybar. Larry specializes in a host of topics, but has been in love with VFD and PLC since 1972. He is a graduate of Cornell University where he earned a power engineering degree.

Cost: \$150 per person

February 14th
